Description:

- Designed and developed a professional web developer portfolio using modern technologies and frameworks to showcase my skills and projects in the field of web development.

Technologies Used:

- **Next.js**: Utilized for building a fast, server-rendered React application to enhance performance and SEO optimization.
- **GSAP (GreenSock Animation Platform)**: Integrated GSAP for creating engaging and smooth animations to enhance user experience.
- **Framer Motion**: Employed Framer Motion for seamless animations and delightful transitions throughout the portfolio.
- **Tailwind CSS**: Implemented Tailwind CSS to expedite the styling process and maintain a consistent design system.
- **Locomotive Scroll**: Integrated Locomotive Scroll to ensure a smooth scrolling experience, enhancing overall user navigation.
- **Mailgun API**: Integrated Mailgun API to handle the contact form, enabling secure and reliable message forwarding to my email.

This project showcases my proficiency in modern web development technologies and my ability to create an aesthetically pleasing and functional portfolio, including secure communication through the Mailgun API for handling messages from visitors.
